## Hand in Hand Foundation

Erasmus+

### SHARING THE EUROPEAN PATHWAYS

15/KA2AE/13570

The main focus of the STEPS project is:

- to improve and extend the offer of high quality learning opportunities
- that are tailored to individuals needs

# Main activities

Provide tailored training aimed at **the service users**:

- helping speak for themselves
- act as co-trainer to train staff in new community based services

Produce training to retrain the **staff** from working in an institution to working in the community

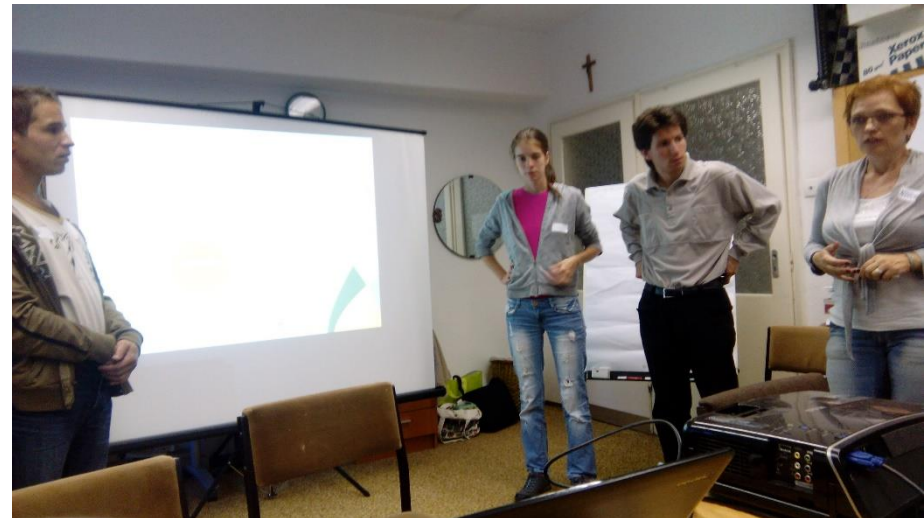

# Innovative element

Connect the service users and the staff using training programs:

- so, the **service users act as trainers** for the frontline staff
- and advocates for their own support service.
